- **One shot, one kill:** When you have time to carefully aim at a human target, roll +**tactics**. On a hit, you eliminate the target. - **Advanced Marksmanship:** At far and extreme weapon range, you add the **quick** tag to any precision rifle or battle rifle you operate.
- **Forward Observer:** When you observe the enemy from a concealed position and report their movements and disposition up the chain of command, roll +**tactics**. On a 10+, choose two. On a 7-9, choose one. Your unit gets:

- **Ghost in the machine:** When you employ electronic warfare, roll+tactics. On a hit, you take control of a remote system, gather +intel, and/or deny the enemy access. On a 7-9 also, the GM will choose one: cost (gear/time), exposure, or compromise.

LOADOUT

- **Assault Rifle** (3d near/far spray).
- **LMG** (3d far area autofire suppress).
- **SMG w/suppressor** (2d tight/close spray quick quiet).

Armor: Kevlar vest and helmet (1-tough).

Also: Sidearm w/suppressor (2d tight quick quiet), combat knife (2d tight) frag and smoke grenades, flashbangs, ammo, hydration system, backpack, corner mirror, NVGs, zip ties, climbing gear, barter worth 3-smokes, 1-personal item (detail).

COMBAT MOVES

ATTACK

When you **attack the enemy** or **suffer an attack**, roll dice on the VOF table to determine its effects (based on the weapon and the volume of fire—incidental, direct, or concentrated). The GM also assigns *concealment* (reduces VOF by one step) and *cover* (reduces damage dice 1-for-1) as established.

ASSAULT

+BATTLE

When you **assault the enemy** to seize territory or gain a tactical advantage, spend 1-gear and roll+**battle**. On a hit, you hammer the enemy with your weapon and seize contested ground under enemy fire as established. **On a 10+**, GM decides if you push them back, force them to surrender, or if you gain an overlooking or flanking position.

COVERING FIRE

+BATTLE

When you **provide covering fire**, spend 1-gear and roll+**battle**. On a hit, you rake the enemy's position with fire, giving friendly troops an opportunity; but, your VOF is reduced by one step. GM chooses: the enemy is *suppressed* or the enemy is *pinned* but finds *cover* and/or *concealment*. **On a 10+**, you also give the allies you cover +1forward.

HIT THE DECK

+GUTS

When you come under fire and **hit the deck**, roll+**guts**. On a hit, you scramble to *cover* and/or *concealment*, as established—apply them to whatever attack you're facing now; but you're also *pinned*. **On a 10+**, you aren't *pinned*, just *suppressed*.

PUSH YOURSELF

+GUTS

When you need to **push yourself** through physical hardship, emotional trauma, or enemy fire, roll+**guts**. **On a 10+**, you keep calm and carry on. **On a 7-9**, you push through it; but you avoid a direct, honorable, or all-in confrontation with the problem at hand. Say how and why you take it slow, keep your head down, pass the buck, or cover your ass. GM says what it costs you: time, trouble, respect, stress, etc.

COMBAT ACTION

+BATTLE OR
+TACTICS

When you **attempt a dangerous combat action**, say what you're doing and roll. If you do it...

...by brute force, violence, or aggression, +**battle**.

...by observation, wits, or maneuvering, +**tactics**.

...by sheer nerve or luck, +**lucky**.

On a hit, you do it, taking fire as established. On a 7-9, also, you're in a tough spot now. The GM will offer you a worse outcome, hard bargain, or ugly choice—concerning gear, stress, wounds, allies, exposure, opportunity, etc.

This is the catch-all combat move. If a more specific move applies, use it instead.

SUPPORT MOVES

ASSESS

+TACTICS

When you **assess the situation**, ask a question about what the fuck is going on and roll+**tactics**. **On a 10+**, the GM will answer generously, including a few follow-up questions. **On a 7-9**, the GM will give you a straightforward answer. **On a 6-**, the GM will tell you something true, but incomplete.

RALLY

+LEADERSHIP

When you **rally the troops before action**, roll+**leadership**. **On a 10+**, hold 3. **On a 7-9**, hold 1. During the execution of the action, spend your hold 1-for-1 for you or a member of your team:

- Keep your head down! Get 1-tough.
- You can do this! Get +1grit.
- Short, controlled bursts! Recover 1-gear.

HELP

+BOND

When you **help someone who's rolling**, roll+**bond**. On a hit, you give them +1. **On a 7-9**, also, you're exposed to danger, retribution, or cost. When you **help someone who's in trouble**, roll+**bond** and **mark xp**. On a hit, they can clear a condition, temporarily *stabilize*, or recover 1-stress. *If you ignore a comrade who needs help, take stress equal to your bond and you both reset your bonds to 0.*

IN TROUBLE,
MARK XP

LIBERTY MOVES

BLOW OFF STEAM

+SMOKES
SPENT (0-3)

When you use your downtime to **blow off some steam**, roll+**smokes spent** (0-3). **On a 10+**, choose two. **On a 7-9**, choose one:

- Improve a bond by +1. They can do the same.
- You recuperate. Heal 1-wound.
- You relax and enjoy yourself. Heal 1-stress.

On a miss, you gain little comfort; but, nothing terrible happens.

SCROUNGE

+LUCKY

When you **scrounge for spoils**, roll+**lucky**. On a hit, you find **gear** or barter items worth **smokes**, depending on circumstances (usually 1-3). Or, if you're scrounging an enemy position for intelligence, you find **intel**. **On a 10+**, choose two. **On a 7-9**, choose one:

- You find it quickly.
- You find it without trouble.
- You hit the jackpot. 6-gear/smokes or major intel.

RESUPPLY

When you **resupply from the unit reserves**, distribute up to 6-gear between yourself and other soldiers and remove 1-supply from the unit stocks. When you consolidate, remove 6-gear and increase your unit reserves by 1-supply.

PERIPHERAL MOVES

WILL

+LEADERSHIP

When you **impose your will**, roll+**leadership**. On a hit, they have to choose: obey your command or suffer 1-stress. **On a 10+**, it's 2-stress instead.

PETITION

+LEADERSHIP
OR SMOKES
SPENT (1-3)

When you **petition up the chain of command**, roll+**leadership** or **smokes spent** (1-3). On a hit, you find a contact who will try to make it happen if it's at all reasonable. **On a 7-9**, the GM chooses a compromise:

- You get something close.
- You have to burn that bridge.
- You have to fuck someone over.
- You owe something in return.

RECOVERY & HEALING

When you **recover** a wound or stress, erase a mark in one of the boxes to the left of the line. When you **heal** a wound or stress, erase a mark from any box. When you have 3+ wounds or 4+ stress, you have the **critical condition**, and you'll get worse until you're stabilized and the condition is removed (see the *help* or *medic!* move).

NPC ACTION

+OP

When your fellow **NPC soldiers take independent action**, roll+**operational effectiveness (op)**. On a hit, they do it to the best of their ability. **On a 7-9**, there's an additional cost; men, materiel, morale, or a mix (GM roll on VOF table for results, see page EW2).

ATTACK A VEHICLE

+BATTLE

When you **attack a vehicle** with an AP weapon, roll+**battle**. On a hit, roll damage to the vehicle as established. For each wound, inflict a major condition. For each stress, inflict a minor condition. If a vehicle takes 3 or more major conditions, it is destroyed. If it takes 3 or more minor conditions, it is disabled until repaired.

Subtract vehicle armor from wounds taken first, then stress if any remains. Vehicle crew takes damage as established.

MAJOR: Out of control, burning, stuck, system destroyed (detail), blind. **MINOR:** Slowed, wild, smoking, system damaged (detail), leaking.

END OF SESSION CHECKLIST

At the end of the session, each player should double-check the **xp move** for their playbook in case they forgot to mark xp for it during play.

In addition, check each of the following:

- Completed mission objective (1 xp)
- Valor beyond the call of duty (3 xp)
- PC died (mark improvement on next character)

THE REGIMENT: ELEMENTS OF WARFARE

EW2

ALPHA 2.1

ENGAGEMENT MOVE

ENGAGE

+0P

When you *begin a new engagement*, roll+operational effectiveness (OP). On a 10+, choose two. On a 7-9, choose one:

- You seize the initiative. You act while the enemy must react.
- You maintain unit cohesion. Your forces are positioned where you want them and are ready for immediate action.
- You gain a tactical advantage; establish a superior position, find cover/concealment, identify key enemy targets, etc. as established.

This move sets the stage for the beginning of the action, so you can skip lots of planning (see GM2).

VOLUME OF FIRE

VOF	1	2	3	4	5	6
I			S	S	S	W
D	S	S	S	W	W	W
C	2S	W	W	W	W	2W

If VOF would increase past concentrated, add +1d instead. If VOF would decrease below incidental, subtract 1d instead. For any effective attack, the minimum VOF is 1d incidental.

FORCE PARITY: When a larger force attacks a smaller force, increase VOF by one, and vice versa.

UNIT MANEUVERS: When *NPC units maneuver* to engage the enemy and/or seize objectives, roll damage on the VOF table to see how they fare. Stress results indicate loss of morale, materiel/supply issues, delays, or confusion. Wound results indicate casualties suffered.

Begin with 3d direct fire, then increase/decrease damage and VOF depending on the strength of the opposition, situational factors, and cohesion of support/leadership.

By rolling VOF results for two opposed units, the GM can quickly determine results for off-screen engagements.

DEFENSIVE FACTORS

Cover: Removes damage dice from an attack before the roll, 1-for-1.

- 1-cover:** A ditch, a low wall, a window or doorway, rubble
- 2-cover:** a trench, sandbags, inside a building
- 3-cover:** A bunker

Concealment: Reduce volume of fire by one (into and out of).

Movement: Reduce volume of fire by one if the attacker or the target is moving quickly (relative to the situation at hand).

Tough: Durability, either natural or from body armor. Reduces wounds taken, 1-for-1.

Grit: Mental fortitude. Reduces stress taken, 1-for-1.

WEAPON RANGES

TIGHT	CLOSE	NEAR	FAR	EXTREME
0-7	8-25	26-100	101-300	301-500

Distances are in yards. *When you're attacking outside the optimal range(s) of your weapon, take -1d per increment.*

WEAPON TAGS

#d: No. of damage dice rolled.

AP: Armor penetrating. Use the *attack a vehicle* move to engage armored vehicles instead of *combat action*.

Area: The weapon inflicts harm on everyone in its area of effect (contrast w/ *messy*).

Autofire: Spend 1-gear to make an *area* attack or do +1 VOF to a small group of targets (contrast w/ *spray*).

Breach: This weapon knocks down doors, punches holes through walls, and may reduce cover.

Burn: The target of this attack is set ablaze and remains on fire. Damage is dealt continuously until the fuel is exhausted or the fire is extinguished.

Crew: The weapon requires the specified number of crew to operate or you take -1d when using it.

Expend: The weapon is removed after one use.

HEAT (High-Explosive, Anti-Tank): +2AP vs. armored targets.

Indirect: The weapon may be fired over obstacles to engage targets that are not visible to the operator.

Messy: Attacks other targets in its area of effect with *incidental fire* (contrast w/ *area*).

Ordnance: When you attack with this weapon, spend 1-gear.

Quick: When there's a question of speed, a quick weapon acts first.

Reload: After the weapon is used, it takes time to prepare before it can be used again.

Spray: At tight or close range, spend 1-gear to attack a small group or do +1 VOF to a single target (contrast w/ *autofire*).

Suppress: Applies the *suppressed* condition. When you *push yourself* against this weapon, take -1.

Terror: When you *assault the enemy* and hit, they must break and run. When you *push yourself* against a terror weapon, take -2.

CONDITIONS

Critical: When you have 3+ wounds or 4+ stress, you have the *critical* condition. You'll get worse until you're stabilized and the condition is removed (see the *help* or *medic!* move).

Suppressed: Your volume of fire is reduced by 1. If you're suppressed again while you have this condition, you're *pinned*.

Pinned: VOF reduced further by 1 and you can't move from your position. If you're pinned and then suppressed, continue to reduce VOF.

You can *push yourself* to overcome the effects of a condition. *The help move can be used to remove a teammate's condition.*

NPCS

NPC enemies don't have separate stress and wounds damage tracks. They just have one track: **strength**. When an NPC unit runs out of strength, it can no longer fight. Apply both stress and wounds inflicted to the strength damage track (so there's no need to roll damage when NPCs take direct fire, unless you need the added detail).

An NPC unit has 3-strength. 2 damage will put it down, and 3 will take it out. A unit can represent a single soldier, a fireteam, a squad, a platoon, etc. depending on the size of the engagement.

USING BATTLE PLANS

Battle plans are a new thing we're trying out for Alpha 2.0. They're the same mechanic as the **workspace** rules from *Apocalypse World*.

The idea is to help players and the GM organize the action of the game by offering military objectives in simple packages consisting of goals, methods and considerations. Here's how it works.

When a **player decides to achieve an objective on the battlefield**, and isn't sure how to go about it, show them the battle plans and pick the closest that applies. To achieve the **goal**, the player (and allies) must execute the **methods** of the plan. You can judge the ongoing success of the action (and the potential for trouble) by how thoroughly the soldiers achieve the methods of the plan. The **considerations** of a plan are usually intelligence items that will enhance the execution of the plan or help the soldiers avoid danger. They're optional but useful components. (The battle plans *recon patrol* and *infiltration* are good ways to gather intelligence to inform considerations for other plans.)

As GM, you control the scale of the “camera” in the game. For most battle plans, you will “zoom in” on the combat as the soldiers execute the plan, following them in the moment-by-moment action. Sometimes, though, it makes sense to “zoom out” and deal with the execution of a plan as a simple dice roll. You can use the *engage* move and the *unit maneuvers* mechanic (EW2) to handle these situations, which most commonly will involve NPC characters, off-screen.

DON'T GET BOGGED DOWN IN PLANNING!

This is the classic problem with tactical games: given the high stakes of combat, players will (understandably) try to plan for every last contingency, which can lead to sessions that are 3 hours of planning and discussion and one hour of action. I know... I ran other war RPGs for years and this was SOP — which is why *The Regiment* gives you tools to skip over all that planning and cut right to the beginning of the action. Here's how you do it.

- Ask the players what their plan is in broad strokes. One or two sentences, tops.
- Try to distill this down to a clear **goal**. If this goal matches one of the battle plans, you're all set. If not, modify a plan that's close, or quickly throw a plan together to fit the goal.
- Use the **methods** and **considerations** to ask the players a few key questions about what they want to do.
- Roll the **engagement move**. The outcome will tell you the starting point of the action. Are the PCs in a good spot? In trouble? Scattered in disarray? Use the outcome of this roll to frame the establishing shot of the movie, so to speak. Tell the players the situation — mix in their POV as much as you can to immerse them in the circumstances — then ask what they want to do.
- Now you're down at the moment-to-moment action level! Long, boring planning session skipped.
